## **CoreInformation Technology Launches New Website**

*Updated design is mobile friendly for technology job seekers*

*Technology professionals can search for jobs nationwide on CoreInformation Technology's new website, whether they're using their smart phone, tablet or personal computer.*

Salem, NH—April 2014— CoreInformation Technology announced today that it has launched a new website at [www.coreinfotechnology.com](http://www.coreinfotechnology.com) for their contract and permanent placement IT divisions. The new state-of-the-art site is more mobile friendly for technology job seekers.

Experienced technology professionals use the website to search for contract/consulting, contract to permanent or direct hire positions with leading companies nationwide.

CoreInformation Technology has career opportunities available in the following specialties, and more:

- Cloud, Big Data, Storage, SaaS, Virtualization
- Mobile Computing for iPad, iPhone, Android, iOS
- CRM & ERP for Retail, Insurance, Financial, & More
- Healthcare IT for Clinical Providers and ISV's
- Infrastructure, Systems and Hardware Engineers
- Database Developers and DBA's: Oracle, SQL
- Quality Assurance and Systems Test

*For Immediate Release*

- Java, Spring, Hibernate, C++, OOD
- JavaScript, UI, Node, Backbone, Angular
- .Net, C#. ASP.NET, VB.NET
- Business Analysts
- SAS Programmers and Analysts
- Analytics, Business Intelligence

CoreInformation Technology President and CEO Armand L. Circharo Jr. believes the new website will help streamline the job-seeking process for tech professionals, connecting them with CoreInformation Technology's experienced career placement counselors and job opportunities.

"As a technology staffing firm, the primary function of our website is to provide a portal within the Web for clients and applicants to access the host of services and features we provide," says Circharo. "Our new site has streamlined this process regardless of the device that our job seekers are using."

Circharo added, "We've provided a state-of-the-art website that will transform the user experience and allow us to maintain a highly personal level of service throughout the placement process."
